Solutions**

**Refurbishment
Solutions**

MAINTENANCE SOLUTIONS

Your lifting equipment is a major investment worth protecting. With over 20 years of industry experience, Mashariki Materials Handling provides cost-efficient, full-service maintenance and repair solutions — so you can focus on your core business while we handle equipment reliability.

Equipment Efficiency

Well-maintained equipment operates at peak performance, boosting operational efficiency and getting work done faster.

Prevent Small Problems

Proper maintenance corrects minor issues before they become large and costly — a proactive approach saves money.

Avoid Costly Repairs

Major problems lead to expensive downtime and schedule delays. Maintenance is far cheaper than fixing big problems.

Boost Resale Value

Detailed maintenance records demonstrate reliability and proper care, maximizing your equipment's resale value.

Enhanced Safety

Consistent, comprehensive maintenance is a proactive step in reducing workplace damages, injuries, and fatalities.

Tailor-Made Plans

We design custom maintenance solutions that transfer the equipment burden to us, so you focus on what you do best.

REFURBISHMENT & INSPECTIONS

REFURBISHMENT SOLUTIONS

Regardless of the Original Equipment Manufacturer, we can refurbish and modernize your lifting equipment — giving it a new lease of life.

- Improved safety & re-certification
- Improved efficiency
- Increased operational life
- Decreased maintenance cost
- Decreased downtime

PROOF LOAD TESTING & INSPECTIONS

Under the OSHA Act and other Regulations, you are required to undertake necessary tests to ensure any major mechanical or structural maintenance or repair to your lifting devices are suitable and safe with adequate strength before being placed back into service.

At Mashariki Materials Handling, we have suitably qualified independent personnel who can undertake all required testing & certification tasks.

PARTS SUPPORT & SERVICES

"The shortest distance between two points is a straight line."

We partner with our customers to offer end-to-end support for your equipment to minimize downtime. Our inventory management program keeps your critical parts on shelf or ships repeat blanket orders on a schedule determined by the customer.

1

Inventory Management

Critical parts kept on shelf and available exactly when you need them.

2

Blanket Order Scheduling

Repeat orders shipped on customer-determined schedules for seamless operations.

3

End-to-End Support

Full-circle equipment support from supply to installation and ongoing servicing.

4

Minimized Downtime

Fast parts access means your operations keep running with minimal interruption.
